MAJOR PROJECT

Abstract

Title: RGUKT- Professors and Projects.

Our project aims to bundle the professional expertise of various professors in our university and sophisticates them in project handling. Our web application provides the professors information and the projects developed by students under their guidance. Which helps the upcoming engineering students in project selection, avoids identical project selection. We are using HTML, CSS, JavaScript and Database for storage.

Our project can used in two personas i.e, User persona and admin persona. User have access to read the project in the website and admin has the privilege to read , add new projects , deleting and updating projects in the website.
